Workshops

Scheduled presentations

Terry Smythe- Roll Scanning. In this work shop Terry Smythe will demonstrate the latest MK4 roll scanner designed and built by Larry Doe. This unique scanner not only scans for conversion to MIDI but also has the capability of copying lyrics and stop changes.

Geoffrey Kaiser- Duo Art Fan System

Bennet Leedy- Valve construction and specialized tools. Professional rebuilder Benett Leedy will demonstrate proper valve rebuilding and some of the specialized tools needed.

Yousuf Wilson- "You Can Do It" Building a small or large instrument using discarded stacks, pipes, etc. Anything from a 20 note monkey organ to an orchestrion

Jack Breen Saving the Musical Heritage. In this workshop the process of optically scanning rolls into the computer will be demonstrated with the Violano and rollography scanning used as examples.

Mike Edwards- "Should or Can You Do It" Basic finish touch up. Mike Edwards, certified by Star, Mohawk and Minuteman finishing companies, will demonstrate quick and easy ways to polish, clean or "touch up" those unsightly scratches in your instruments or furniture

Spencer Chase- Electronic coding of Duo Art rolls
